Subject: RadTown fact sheet edits - wireless technology

- Second sentence at the top should read: RF energy is one type of non-ionizing radiation.
- "Rules and Guidance" FCC entry should read: In the United States, the FCC sets safety guidelines that limit RF exposure. They license transmitters and facilities that generate RF and microwave radiation. The FCC has adopted exposure limits for RF energy. All hand-held wireless devices sold in the United States must comply with these limits.
- "Rules and Guidance" section, the FDA header should read:
U.S. Department of Health and Human Services (HHS), U.S. Food and Drug Administration (FDA)
